

Security Program Assessment

Evaluate your information security program to improve your security posture and reduce risk

BENEFITS

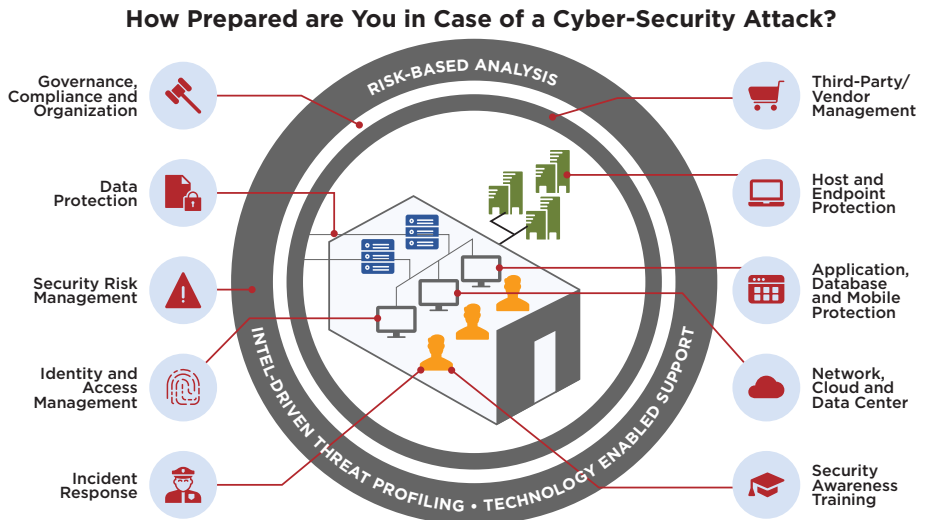

- Reduce the risk of breach and data theft
- Reduce the impact of security incidents
- Build consensus on security improvements
- Prioritize budget and resources

Mandiant has been at the forefront of cyber security and cyber threat intelligence since 2004. Our incident responders have been on the frontlines of the most complex breaches worldwide. We have a deep understanding of both existing and emerging threat actors, as well as their rapidly changing tactics, techniques and procedures. The Security Program Assessment draws on this expertise to deliver tailored, actionable recommendations that will improve your security posture, reduce risk and minimize the impact and cost of a security incident.

Overview

We combine industry standards with our expertise and intelligence to evaluate your program across 10 critical security domains. During the assessment, Mandiant consultants review documentation, perform interviews and facilitate interactive workshops to understand your current state and to ensure future improvements are driven through collaboration. We deliver actionable recommendation and an implementation roadmap specific to your organization's short- and long-term goals.

Figure 1. 10 Critical Security Domains.

WHAT YOU GET

- Executive Summary:**
 A summary of findings and recommendations along with key benchmarking insights.
- Observations and Gap Analysis:** Using industry frameworks as a benchmark, the gap analysis identifies domains that need further development and provides a maturity development plan to help strengthen security posture and reduce risk.
- Security Program Roadmap and Recommendations:**
 A strategic and tactical plan with recommendations on sequencing and prioritization for improving the effectiveness across domains.
- Industry Benchmarking Insights:** Customers will get insights on the security posture and risk profiles of similar-sized companies in their industry vertical.

Our Approach

We conduct an in-depth evaluation of the organization's information security programs across 10 security domains, each of which is mapped to compliance, security and industry frameworks. At the end we provide findings prioritized into short-, medium- and long-term recommendations designed to improve the organization's security posture, based on its risk posture and security maturity level at the time of assessment.

Recommendations will include guidance on how to fully utilize existing tools as well as suggestions for new tools and processes that can be implemented to improve security posture and reduce risk.

Assessment Process

Step 1: Documentation collection and analysis

Step 2: Interactive workshops and executive meetings

Step 3: Recommendations and roadmap
